my commitment and statement to architecture

I understand architecture as social art and the city as a piece of art (1998).

The free human, its acts and its possibilities of acquisitions in space represent our motivation.

Creating space means to transform and to relate the cultural, climatic and social contexts to an economic process – but nevertheless as art.

Each one of my few realized projects is original and distinctive. My work constitutes identity and place beyond the special circumstances. Personally I am bored of repetition and establishing a kind of individual, aesthetical design in order to constitute a recognizable oeuvre and brand; except my appreciation for the power, the energy and the mutual characteristics of complex appearances within the phenomenon water. So therefore diversity and variety always document my work and both let me be curious to research for my next projects.

Thanks to my qualifications and experiences in architecture, hydraulic engineering, agricultural engineering, landscape and infrastructure management, urban development, I can offer interdisciplinary and systemic approaches for our projects. When it comes to urban demands and developments, I use timesaving creative mediation-tools for a binding agreement between private and public sectors.

I`m emphatically engaged for an interdisciplinary teamwork and try to mediate that private as well as public space is signifying for a meaningful human society, changeable between pragmatics and philosophy. Everything represents (signifies) everything - homologous but rather differently.
maxR

education - university

study of civil- & environmental engineering University of Agriculture, Vienna
from 1977-1984

graduated diploma 1984 (Dipl.-Ing.)

study of architecture at masterclass Hans Hollein, University of Applied Arts,
Vienna from 1980-1986

graduated diploma 1986 (Mag.-arch)

workshops with Mario Bellini, Joseph Beuys, Herrmann Czech, Frank Gehry,
Karl Lagerfeld, Alessandro Mendini, Bazon Brock
1982-1986

International Summer Academy Salzburg Malerei Gotthard Graupner
1982, 1983
